

LifeStraw®
2026 CATALOG

IT ALL STARTED WITH

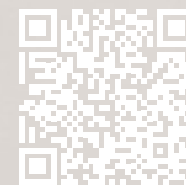

A SIMPLE STRAW

LifeStraw was born from a bold mission—to stop Guinea worm disease at its source. Through our partnership with The Carter Center, we developed the first LifeStraw Guinea worm filter in 1999. Since then over 40 million Guinea worm filter straws have been donated, stopping disease transmission and driving cases down to just 14 worldwide. This will be the first disease eradicated without the use of a vaccine.

By 2030, it is targeted that we will witness the eradication of Guinea worm forever—proof that innovation, collaboration, and relentless action can change the course of history.

AND WE DIDN'T STOP THERE....

Find out more about our partnership with the Carter Center to eradicate guinea worm disease:

LIFESTRAW IS THE LEADING BRAND IN

WATER FILTRATION

Holding a 41.2% dollar share and a 47.5% unit share in 2024, LifeStraw is the market leader in the outdoor sports and recreation water treatment category.

Every product directly fuels our LifeStraw Give Back Program.

RECENT AWARDS +
ACCOLADES

AS SEEN IN

GIVE BACK PROGRAM

EVERY PRODUCT PURCHASED MAKES AN IMPACT

Through our Give Back program, LifeStraw has provided over 11 million children with a year of safe drinking water, empowering schools and communities with lasting access to clean water and a healthier future.

HOW DOES THE PROGRAM WORK?
When a consumer purchases any LifeStraw product, a portion of that profit helps to fund the distribution of a LifeStraw Community Purifier to a school, as well as training, education, maintenance, and spare parts.

HOW IS OUR PROGRAM UNIQUE?
We're not a one for one, and there's a reason.

Not every product serves every context or water need! We have a portfolio of products designed specifically for low resource settings. We don't just drop off products. We provide onsite education and training, and year-round support to build and maintain relationships with our schools and communities, and to ensure the purifiers are properly maintained and used. We make a five-year commitment to every school. We commit dedicated staff and resources to ensure our program is sustainable for the long-term. We renew the five - year commitments until schools themselves are able to provide safe water to all students. We hire locally. In western Kenya, we employ 40 full-time staff to ensure year-round training and education, implementation, and product maintenance and support. All programs are managed by local staff that come from the communities they support.

IN TIMES OF CRISIS,

LIFESTRAW ACTS QUICKLY

Through LifeStraw's Safe Water Fund, we deploy safe water solutions to communities impacted by natural and manmade disasters, including in 2024 our work in Western North Carolina, Gaza and Ukraine. With response efforts spanning over 65 countries, we have provided critical aid where it's needed most, ensuring access to safe drinking water in the face of devastation.

THE TECHNOLOGY

ALL LIFESTRAW PRODUCTS START WITH ADVANCED HOLLOW FIBER MEMBRANE TECHNOLOGY

What the heck is that? Well, picture bundles of straws with microscopic holes in them, so small that organisms like bacteria, parasites, and even dirt and microplastics cannot pass through. Think of it as a super advanced spaghetti strainer or tea sieve.

ALL LIFESTRAW PRODUCTS

Remove LOG 8 (99.999999%) for bacteria
LOG 5 (99.999%) for parasites/amoebas/cysts
LOG 5 (99.999%) for microplastics
Are BPA Free + FDA Food Grade Materials

INDEPENDENT LAB TESTING

WE ARE THE ONLY WATER FILTER BRAND THAT OWNS AND OPERATES ITS OWN FULLY EQUIPPED ISO CERTIFIED WATER LABORATORY.

We perform cutting edge tests through external internationally recognized labs, on microbiological performance longevity, turbidity and other performance indicators. These labs are accredited by ANSI or WQA and all results are fully available as evidence dossiers.

WE TEST 100% OF OUR FILTERS

WHY WE'RE DIFFERENT

THE
CLIMATE
LABEL
CERTIFIED

Certified

Corporation

TECHNOLOGY + INNOVATION

We innovate technology powerful enough to prevent some of the most harmful diseases and emerging contaminants in the world and we back it with the most rigorous testing in the business.

FOR PEOPLE + PLANET

We recognize our responsibility to positively impact people and planet through our products, programs, and actions. As a proud B Corp and Climate Neutral Certified brand, we're committed to ensuring that respect, diversity, inclusion and equity are a conscious part of all our work.

YOUR PURCHASE HAS IMPACT

For every product sold, a child in need receives safe water for an entire year.

DISASTER RESPONSE

We support provision of safe water during humanitarian emergencies and natural disasters.

OUTDOOR

STRAWS, SQUEEZE BOTTLES, & GRAVITY SYSTEMS

Trusted by hikers, campers, and adventurers alike, LifeStraw's outdoor gear offers reliable protection against bacteria, parasites, microplastics, and more. So you can stay hydrated from practically any freshwater source. Rugged, compact, and ready for your next trail, summit, or campsite.

PEAK SERIES SOLO

SOLO WATER FILTER

LifeStraw Peak Series Solo Water Filter is an ultra-lightweight, compact, portable water filtration device that removes bacteria, parasites, microplastics, silt, sand, and cloudiness from drinking water. The standard 28mm threading on the filter allows it to be screwed onto most common water bottles. The one-handed flip cap makes on-the-go filtration super easy and fast: fill up a 1L bottle in just 20 seconds. Great for hiking, backpacking, camping, emergency situations, travel or on-the-go needs. No backpack, pocket, emergency bag, or glove compartment should be without one.

ULTRA-LIGHT + LONGLASTING

Only 1.7oz and 5.1" long, the membrane microfilter lasts up to 2,000 liters

HIGH FLOW RATE

Our re-engineered filter gets up to 3L per minute. That's really fast.

BPA FREE + LEAK-PROOF

Made with premium, durable 50% post-consumer recycled BPA free plastic. Includes leak-proof top and bottom caps.

HIGHLY VERSATILE

The Collapsible Squeeze Bottle System is designed with every occasion in mind. Use as a bottle, push water through it into cooking containers or other drinkware, use as a straw, or connect to other Peak systems.

Mountain Blue Blue Raspberry Pink Lemonade Limeade Carry Case Add On

Silt, sand, and cloudiness

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites

PEAK SERIES STRAW

PERSONAL STRAW WATER FILTER

We took the most popular outdoor water filtration device on the market, and reimagined it for added versatility, sustainability, a better grip experience, and updated design and colors. This ultra lightweight personal water filter straw is made from high performance premium sustainable materials, it has no extra parts to keep track of, and it boasts an enhanced flow rate for easy sipping. No backpack, pocket, emergency bag, or glove compartment should be without one. Drink directly from lakes, rivers, and streams or fill a container to use your LifeStraw on the go.

LIGHTWEIGHT + DURABLE

Only 2oz, the membrane microfilter lasts up to 4,000 liters

UNLIMITED SHELF LIFE

No need to worry about how long it's been in your emergency go-bag unused.

DRINK FROM ANY FRESH WATER SOURCE

Drink directly from lakes, rivers, and streams or fill a container to use your straw water filter on the go with protection against bacteria, parasites, microplastics, silt, sand, and cloudiness

HIGHLY VERSATILE

Attaches to some single use standard plastic bottles with 28mm thread and to standard gravity hoses with removable threaded bottom cap.

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites

PEAK SERIES SQUEEZE

COLLAPSIBLE SQUEEZE BOTTLE, 650ML + 1 L

It's time to stop carrying around a bag of plastic parts and multiple water bottles. LifeStraw's Peak compact squeeze filtration is an all-in-one water storage and filtration device. Made from premium materials, it's durable enough to last you on your long-haul adventures without having to worry about rips, tears, or punctures. Ultralight and collapsible at less than 4 ounces, you can grab and go, using as a straw filter, storage solution, squeeze system or connecting to other Peak Series systems to best fit your adventure. The filter membrane density has been optimized for flow rate and the over-cap features and smart seal mouthpiece prevent leakage.

ULTRA-COMPACT

Ultra-light + collapsible at less than 4oz means you can grab and go.

BACKCOUNTRY READY

Use for trail running, through hiking and limited space adventures! Protects against bacteria, parasites, microplastics, silt, sand, and cloudiness.

EXTREME DURABILITY

2x thicker, premium materials make it tougher so no worrying about rips, tears or punctures.

HIGHLY VERSATILE

The Collapsible Squeeze Bottle System is designed with every occasion in mind. Use as a bottle, push water through it into cooking containers or other drinkware, use as a straw, or connect to other Peak systems.

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites

PEAK SERIES GRAVITY 3L

GRAVITY WATER FILTER SYSTEM

It's the simple, lightweight and compact option for back-country camping and backpacking. The optimized filtration cartridge boasts a high flow rate and ability to remove sand and silt without clogging. Designed to be ultra-versatile and fully leak-proof, use as a storage system while moving about, or as a straw filter by itself or with a standard water bottle.

BACKCOUNTRY READY

Take it hiking, camping, hang it from the RV or use like an extra large squeeze.

ENHANCED MICROFILTER PERFORMANCE

Our re-engineered membrane and custom backwash accessory means better performance against sand and silt, maintaining great flow over the long haul.

HIGHLY VERSATILE

The Collapsible Squeeze Bottle System is designed with every occasion in mind. Use as a bottle, push water through it into cooking containers or other drinkware, use as a straw, or connect to other Peak systems.

PEAK SERIES GRAVITY 8L

GRAVITY WATER FILTER SYSTEM

The high-capacity system made with high-performance materials designed for long term durability to meet your water filtration and water storage needs. The large cap allows easy filling, cleaning, and leak-proof mobility, with an included smaller plug cap to seal off connection for water storage. The optimized filtration cartridge boasts a high flow rate and ability to remove sand and silt without clogging. It's the only system needed for you and the whole crew as long as you're on your adventure.

BACKCOUNTRY READY

Great for large groups, basecamp, and RV or van travel – easy to hang from a tree or RV for quick hydration.

HIGHLY VERSATILE

Can remove the filter from the gravity bag and use it as a straw on the go or with a water bottle.

ENHANCED MICROFILTER PERFORMANCE

Our re-engineered membrane and custom backwash accessory means better performance against sand and silt, maintaining great flow over the long haul.

EXTREME DURABILITY

Made with premium materials resistant to punctures and rips during your travels.

PEAK SERIES 8L PURIFIER

HIGH-VOLUME, GRAVITY WATER FILTER + VIRUS REMOVAL

A portable, high-capacity water purification system that removes viruses, in addition to bacteria, parasites and microplastics from drinking water. This rugged, 8L system boasts a high flow rate of 30L/hr and has a lifetime capacity of 18,000 liters – about five years of safe drinking water for a family of five. The product is ideal for emergency preparedness and survival situations as well as camping, adventure and international travel. The kit includes a leakproof cap, custom backwash syringe, and hang strap with carabiner for easy hanging and carrying. The system functions exclusively off of gravity and does not require any pumping, batteries or power sources.

HIGH FLOW RATE

30L/hr from gravity – no pumping or external energy source required.

LONG LASTING

The ultrafilter membrane has a lifetime capacity of 18,000 liters – about five years of safe drinking water for a family of five.

QUICK + EASY USE

Simple on/off twist mechanism allows for easy start-up and enables you to stop the flow of water without a pinch clip.

COMPACT

Compact size makes it ideal for emergency preparedness and survival situations as well as camping, outdoor adventures and international travel.

Weight: 26.4oz | 750g Size: 23.5in x 14in Hose Length: 47.2in | 1.2m

NEW 2026

LIFESTRAW ESCAPE

HIGH-FLOW WATER PURIFIER FOR
OFF-GRID AND EMERGENCY USE

The LifeStraw Escape is a high-capacity hand pump water purifier designed for fast-flow, pressurized water filtration wherever you go. Whether you’re prepping for emergencies, heading on a backcountry expedition, or setting up a basecamp, this LifeStraw pressure filter uses 3-stage filtration to remove viruses, bacteria, parasites, and microplastics while improving taste and smell. With just a few hand pumps, it delivers more than 1L/min of safe water—no electricity or gravity needed. The LifeStraw hand pump filter is reusable, easy to clean, and designed for travel-friendly water purification.

- PORTABLE WATER PURIFIER**

Holds 5.25 gallons and delivers over 1 liter of purified water per minute.
- ADVANCED 3-STAGE FILTRATION**

Includes pre-filter, 0.02 micron ultrafilter, and activated carbon + ion exchange filter.
- SMART SAFETY DESIGN**

Integrated pressure relief valve prevents over-pressurization.
- DURABLE & ECO-FRIENDLY BUILD**

BPA-free, FDA-approved materials and refillable filtration reduce reliance on single-use plastic.

Weight: 16lbs (without water) 59lbs (when full) Size: 18in x 13.75in

- PROTECTS AGAINST**

 - 99.999999% of Bacteria
 - 99.999% of Parasites
 - 99.999% of Microplastics
 - 99.999% of Viruses
 - Silt, sand, and cloudiness

Ultrafilter lasts up to 18,000 liters
- Activated Carbon + Ion Exchange Filter:**

Reduces chlorine, lead, bad taste, odors, and organic chemical matter

Activated carbon and ion exchange filter lasts up to 600 liters | 158 gallons

Pore Size: 0.02 micron

Meets US EPA + NSF P231 standards for the removal of bacteria, viruses, and parasites

Meets NSF42 for the removal of chlorine, and Lead as NSF53 up to 600L

ON THE GO

BOTTLES, STRAWS + TUMBLERS

From airport gates to gym bags, LifeStraw's travel-ready water filter bottles are designed for life on the go. Whether you're commuting, running errands, or exploring new destinations, they reduce bacteria, parasites, and chlorine, while improving taste. So you can refill with confidence, anytime.

GO SERIES 18 OZ

INSULATED STAINLESS STEEL WATER FILTER BOTTLE

LifeStraw Go Series is the ultimate sidekick for safer, better-tasting water for travel and everyday use. The 18 oz stainless steel BPA-free bottle filters out nasties, so you can fill up from airport bathrooms, a tap in Mexico, or a gas station while road-tripping, and the slim design fits in most car cupholders! The advanced 2-stage filter improves taste and protects against bacteria, parasites, microplastics, chlorine, silt, sand, and cloudiness.

THE ULTIMATE SIDEKICK

The 18oz stainless steel BPA-Free bottle filters out nasties so you can fill up from airport bathrooms, a tap in Mexico, or a gas station while road-tripping.

SLIM DESIGN

18oz stainless steel - fits in most car cup-holders and backpack sleeves for convenient commuting and running errands.

DOUBLE-WALLED INSULATION

Keeps beverages cool all day.
Not intended for hot liquids as this can cause pressure to build inside.

Membrane Microfilter protects against:

99.999999% of Bacteria
99.999% of Parasites
99.999% of Microplastics
Silt, sand, and cloudiness

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites

Membrane microfilter lasts up to 4,000L

Activated carbon filter lasts up to 100L

NEW 2026

GO SERIES GLASS 20 OZ

HAND-BLOWN GLASS WATER FILTER BOTTLE

LifeStraw Go Series is the ultimate sidekick for safer, better-tasting water for travel and everyday use. The hand-blown borosilicate glass bottle filters out nasties, so you can fill up from airport bathrooms, a tap in Mexico, or a gas station while road-tripping. The advanced 2-stage filter improves taste and protects against bacteria, parasites, microplastics, chlorine, silt, sand, and cloudiness. A silicone sleeve protects your bottle, and the window helps you track water intake all day long. Do good on the go and avoid single-use bottles.

THE ULTIMATE SIDEKICK

The 20 oz borosilicate glass bottle filters out nasties so you can fill up from airport bathrooms, a tap in Mexico, or a gas station while road-tripping.

SLIM DESIGN

20 oz glass - fits in most car cup-holders and backpack sleeves for convenient commuting and running errands.

2-STAGE FILTRATION

Carbon filter + the membrane microfilter filters bacteria, parasites, microplastics, chlorine, and more while improving taste.

Membrane Microfilter protects against:

99.999999% of Bacteria
99.999% of Parasites
99.999% of Microplastics
Silt, sand, and cloudiness

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites

Membrane microfilter lasts up to 4,000L

Activated carbon filter lasts up to 100L

GO SERIES TUMBLER

INSULATED STAINLESS STEEL WATER FILTER TUMBLER

Introducing the first-ever water tumbler that filters while you sip. The LifeStraw Go Series Water Filter Tumbler is independently tested to remove microplastics, bacteria, and more—so you can fill up safely when you need it most. This 18 oz stainless steel tumbler keeps water cool all day, fits conveniently in a car cupholder, and improves the taste of even the most questionable tap water. Do good on the go and avoid single-use plastic bottles.

LEAD-FREE

The tumbler is manufactured without the use of lead sealing dots.

SLIM DESIGN

18 oz stainless steel - fits in most car cup-holders, convenient for commuting and running errands.

DOUBLE WALLED INSULATION

Keeps beverages cool all day.
Not intended for hot liquids as this can cause pressure to build inside the tumbler.

2-STAGE FILTRATION

Carbon filter + the membrane microfilter filters bacteria, parasites, microplastics, chlorine, and more while improving taste.

LIFESTRAW SIP

REUSABLE STEEL FILTER STRAW WITH CARRY CASE

The LifeStraw Sip is the world’s first reusable stainless steel water filter straw capable of removing microplastics, bacteria and parasites from drinking water. Each LifeStraw Sip includes a premium, leak-proof carry case for portability so you can take it with you to sip confidently from hotel and restaurant tap water, or during international travel.

PREMIUM MATERIALS

the Sip is made from high-quality stainless steel with a silicone mouthpiece, and also includes a premium leak-proof carry case for portability and protection.

COMPACT + PORTABLE

Slim and lightweight (less than 3 ounces), the filter straw and included carry case easily fits into your bag, making it a must-have travel companion.

USER-FRIENDLY

no batteries or electrical outlets required; simply sip through the straw, and let the filter work its magic.

EMERGENCY

HIGH-VOLUME PURIFIERS

Whether for natural disasters, humanitarian response, or your home emergency kit, LifeStraw's high-capacity purifiers provide reliable access to safe drinking water. Designed to meet the highest standards, they work without electricity, chemicals, or complicated setup. Just clean water when it matters most.

LIFESTRAW

PERSONAL WATER FILTER

The original LifeStraw is a compact, award-winning personal water filter designed for outdoor adventures, emergency preparedness, and global humanitarian aid. Weighing less than 2 ounces (46 grams), it easily fits into any backpack or emergency kit. Its durable membrane microfilter can purify up to 1,000 gallons (4,000 liters) of water; enough to provide an individual with safe drinking water for over five years. Whether you're hiking, traveling, or preparing for emergencies, the LifeStraw offers peace of mind by ensuring access to safe drinking water.

INDEPENDENTLY LAB TESTED

All Claims Are Verified with Laboratories Using Standard Testing Protocols Set by the US EPA, NSF, ASTM for Water Purifiers.

ULTIMATE SURVIVAL TOOL

No shelf life, easy to clean and store. Provides up to 5 years of safe drinking water for one person.

ULTRALIGHT + DURABLE

Weighs less than 2 ounces so you can pack it anywhere.

LIFESTRAW MAX

HIGH-FLOW WATER PURIFIER

A high-capacity, high-flow water purifier designed to deliver safe drinking water for up to 400 people per day. Ideal for disaster response, humanitarian aid, remote job sites, and emergency preparedness. Requiring no electricity, batteries, or chemicals, it operates with a pressurized water source such as a tap, pump, or gravity system.

Compact and portable at 15 lbs (7 kg), the LifeStraw Max is built with durable, BPA-free, FDA-compliant materials. It meets NSF 53 and 42 standards, as well as US EPA & NSF P231 drinking water standards. With a flow rate of up to 150 liters per hour, it provides a reliable solution for large-scale water purification needs.

PORTABLE + COMPACT

Portable and compact, Max provides safe drinking water for up to 400 people per day.

PRESSURIZED SYSTEM

Pressurized water system (pump, tap, or gravity system) with a minimum water flow of 1 bar pressure; hose to connect to water inlet on Max.

HIGH-FLOW RATE

Instantly purifies water at a rate up to 150 liters per hour at minimum 1 bar inlet pressure (maximum 6 bar pressure) without the need for electricity, batteries, or chemicals.

PROTECTS AGAINST

99.999999% of Bacteria
99.999% of Parasites
99.999% of Microplastics
99.999% of Viruses
Silt, sand, and cloudiness

Lasts up to 26,500 gallons (100,000 L)

Pore Size: 0.02 micron

Meets US EPA + NSF P231 standards for the removal of bacteria, viruses, and parasites

Meets NSF 53 standards for reduction of lead

Meets NSF 42 standard for chlorine reduction

Minimum Required Operating Pressure: 1 bar (15 PSI)

Maximum Pressure: 6 bar (87 PSI)

Weight: 15lbs | 7kg Size: 20in x 15.9in x 13.3in 50.5cm x 40.5cm x 34cm

LIFESTRAW MISSION

HIGH-VOLUME, GRAVITY WATER FILTER + PURIFIER

A 12 liter, gravity-powered water purifier, employing an award-winning technology that requires no chemicals, batteries or moving parts. The LifeStraw Mission removes 99.9999% of bacteria, 99.99% of protozoa, and 99.999% of viruses. The larger capacity of the Mission water purifier is ideal for providing clean water to multiple people, and is designed for camping, hunting, and other group or family activities, as well as disaster and emergency survival prep kits.

COMPACT + ULTRALIGHT

The gravity water filtration system weighs 6.9 oz and can filter a gallon of water in less than 10 minutes.

EMERGENCY PREPAREDNESS

Having a LifeStraw Mission purifier on hand allows access to clean, safe drinking water in the event of a natural disaster or survival situation. There are no batteries to replace and no moving parts to wear out, and LifeStraw products do not expire. Perfect for a home emergency kit.

TRAVELING ABROAD

Gives you peace of mind when abroad. LifeStraw Mission removes bacteria, parasites (including Salmonella, E-coli, Giardia) and viruses. Reliable and effective, LifeStraw products are the perfect accessory for international travel.

CAMPING + HIKING

LifeStraw Mission is the perfect water filter for hiking and camping. Fill in the roll bag and collect safe water in a glass or bottle in minutes. It's the fastest way to filter - let gravity do the work!

Ultrafilter lasts up to 4,755 gal (18,000 L)

LIFESTRAW COMMUNITY

HIGH-CAPACITY, LONG-LASTING WATER PURIFIER

Designed for emergency response, disasters, survival scenarios, and humanitarian work, this ultra-durable water purifier offers high-capacity, long-lasting performance. With a 50L total capacity and a lifespan of 26,000 gallons (100,000L), it meets the highest drinking water standards set by the WHO and US EPA—effectively removing viruses, bacteria, parasites, microplastics, and reducing cloudiness. It can reliably serve 75–100 school children or clinic attendees daily, or up to 25 people per day in survival situations for 3–5 years.

HIGH-CAPACITY

Holds 13 gallons (50 liters) at once, ultra-durable for harsh conditions.

VERSATILE

Requires no electricity batteries, or replacement parts; Easy to assemble, fill, and use; Autofill option to ensure communities have constant access to safe drinking water.

ADVANCED PURIFICATION

Removes (Rotavirus, Hepatitis A), protects against bacteria (including E.coli, Salmonella), parasites (including Giardia and Cryptosporidium), microplastics, organic chemical matter, dirt, silt and sand.

ENSURED LONGEVITY

Made with BPA Free and FDA compliant materials; Built-in backwash handle to ensure longevity of filter.

Weight: 17lbs | 8kg Size: 22in x 22in x 33.5in

PROTECTS AGAINST

99.999999% of Bacteria

A young boy with dark skin and short hair, wearing a light blue school shirt and a dark blue apron, stands outdoors under a large tree. He is smiling and holding two clear glasses up to the camera. The glass in his right hand contains a slightly cloudy, yellowish-brown liquid, while the glass in his left hand contains clear water. In the background, other children in school uniforms are visible, along with a yellow water container and a blue water dispenser. The scene is set in a rural area with green trees and a clear sky.
