

2026

LifeStraw®

IT ALL STARTED WITH A SIMPLE STRAW

LifeStraw was born from a bold mission—to stop Guinea worm disease at its source. Through our partnership with The Carter Center, we developed the first LifeStraw Guinea worm filter in 1999. Since then over 40 million Guinea worm filter straws have been donated, stopping disease transmission and driving cases down to just 14 worldwide.

AND WE DIDN'T STOP THERE....

This will be the first disease eradicated without the use of a vaccine.

Find out more about our partnership with the Carter Center to eradicate Guinea worm disease.

LifeStraw®##

The Leading Brand In Water Filtration

Holding a 41.2% dollar share and a 47.5% unit share in 2024, LifeStraw is the market leader in the outdoor sports and recreation water treatment category.

Every product directly fuels our LifeStraw Give Back Program.

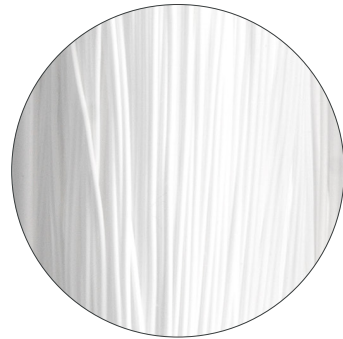

RECENT AWARDS + ACCOLADES

AS SEEN IN

ALL LIFESTRAW PRODUCTS

Remove LOG 8 (99.999999%) for bacteria

LOG 5 (99.999%) for parasites/amoebas/cysts

LOG 5 (99.999%) for microplastics

Are BPA Free + FDA Food Grade Materials

THE TECHNOLOGY

ALL LIFESTRAW PRODUCTS START WITH ADVANCED HOLLOW FIBER MEMBRANE TECHNOLOGY

What the heck is that? Well, picture bundles of straws with microscopic holes in them, so small that organisms like bacteria, parasites, and even dirt and microplastics cannot pass through. Think of it as a super advanced spaghetti strainer or tea sieve.

TECHNOLOGY + INNOVATION

We innovate technology powerful enough to prevent some of the most harmful diseases and emerging contaminants in the world and we back it with the most rigorous testing in the business.

INDEPENDENT LAB TESTING

WE ARE THE ONLY WATER FILTER BRAND THAT OWNS AND OPERATES ITS OWN FULLY EQUIPPED ISO CERTIFIED WATER LABORATORY.

We perform cutting edge tests through external internationally recognized labs, on microbiological performance longevity, turbidity and other performance indicators. These labs are accredited by ANSI or WQA and all results are fully available as evidence dossiers.

WE TEST 100% OF OUR FILTERS

OUR GIVE BACK PROGRAM WHERE

EVERY PRODUCT PURCHASED MAKES AN IMPACT

Through our Give Back program, LifeStraw has provided over 14 million children with a year of safe drinking water, empowering schools and communities with lasting access to clean water and a healthier future.

1 PRODUCT

1 CHILD

1 YEAR OF
SAFE WATER

HOW DOES THE PROGRAM WORK?

When a consumer purchases any LifeStraw product, a portion of that profit helps to fund the distribution of a LifeStraw Community Purifier to a school, as well as training, education, maintenance, and spare parts.

HOW IS OUR PROGRAM UNIQUE?

We're not a one for one, and there's a reason.

Not every product serves every context or water need! We have a portfolio of products designed specifically for low resource settings. We don't just drop off products. We provide onsite education and training, and year-round support to build and maintain relationships with our schools and communities, and to ensure the purifiers are properly maintained and used.

We make a five-year commitment to every school.

We commit dedicated staff and resources to ensure our program is sustainable for the long-term. We renew the five - year commitments until schools themselves are able to provide safe water to all students.

We hire locally. In western Kenya, we employ 40 full-time staff to ensure year-round training and education, implementation, and product maintenance and support. All programs are managed by local staff that come from the communities they support.

IN TIMES OF CRISIS,

LIFESTRAW ACTS QUICKLY

Through LifeStraw's Safe Water Fund, we deploy safe water solutions to communities impacted by natural and manmade disasters, including in 2024 our work in Western North Carolina, Gaza and Ukraine. With response efforts spanning over 65 countries, we have provided critical aid where it's needed most, ensuring access to safe drinking water in the face of devastation.

FOR PEOPLE AND PLANET

We recognize our responsibility to positively impact people and planet through our products, programs, and actions. As a proud B Corp and Climate Neutral Certified brand, we're committed to ensuring that respect, diversity, inclusion and equity are a conscious part of all our work.

OUTDOOR

STRAWS, SQUEEZE BOTTLES, & GRAVITY SYSTEMS

Trusted by hikers, campers, and adventurers alike, LifeStraw's outdoor gear offers reliable protection against bacteria, parasites, microplastics, and more. So you can stay hydrated from practically any freshwater source. Rugged, compact, and ready for your next trail, summit, or campsite.

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites

HIGH FLOW RATE

30L/hr from gravity – no pumping or external energy source required.

LONG LASTING

The ultrafilter membrane has a lifetime capacity of 18,000 liters – about five years of safe drinking water for a family of five.

QUICK + EASY USE

Simple on/off twist mechanism allows for easy start-up and enables you to stop the flow of water without a pinch clip.

COMPACT

Compact size makes it ideal for emergency preparedness and survival situations as well as camping, outdoor adventures and international travel.

Weight: 26.4oz | 750g | Size: 23.5in x 14in | Hose Length: 47.2in | 1.2m

PEAK SERIES ACTIVATED CARBON FILTER

COMPATIBLE WITH LIFESTRAW PEAK SERIES

COMPATIBLE WITH MULTIPLE SYSTEMS

Designed for seamless use with LifeStraw Peak Series collapsible squeeze bottles, solo water filters, and gravity water filter systems.

REDUCES CONTAMINANTS

Filters out heavy metals including lead, mercury, chromium III, cadmium, and copper for safer drinking water.

LONG-LASTING

Each replaceable filter lasts up to 26 gallons (100 liters), offering extended use before needing replacement.

IMPROVES TASTE

Activated carbon + ion exchange filter reduces chlorine, odors, and organic chemicals, providing better-tasting water.

Green

Weight: 1.6oz | 46g Size: 1.2 x 9in | 2.5cm x 22.9cm

PROTECTS AGAINST

99.999999% of Bacteria
99.999% of Parasites
99.999% of Microplastics
Silt, sand, and cloudiness

Pore Size: 0.2 micron

Meets US EPA + NSF P231 standards for the removal of bacteria and parasites.

Membrane microfilter lasts up to 1,000 gal | 4,000 L

ULTRALIGHT + DURABLE

Weighs less than 2 ounces so you can pack it anywhere.

ULTIMATE SURVIVAL TOOL

No shelf life, easy to clean and store.
Provides up to 5 years of safe drinking water for one person.

INDEPENDENTLY LAB TESTED

All Claims Are Verified with Laboratories Using Standard Testing Protocols Set by the US EPA, NSF, ASTM for Water Purifiers.
