

Matador®

SPRING/SUMMER 2026

FOR THE TRAVELERS™

WE ALL TRAVEL FOR DIFFERENT REASONS

Whether it's the adventure of the unknown, the feeling of connection, or the experiences that make us who we are...

Sometimes we find what we're looking for, or maybe we discover it was the pursuit itself that mattered all along. Either way, we always return with something more.

At Matador, we make travel gear for the curious, the open-minded, the bold. We travel for different reasons, but we're all in pursuit of experiencing the world unfiltered, first-hand, without limits.

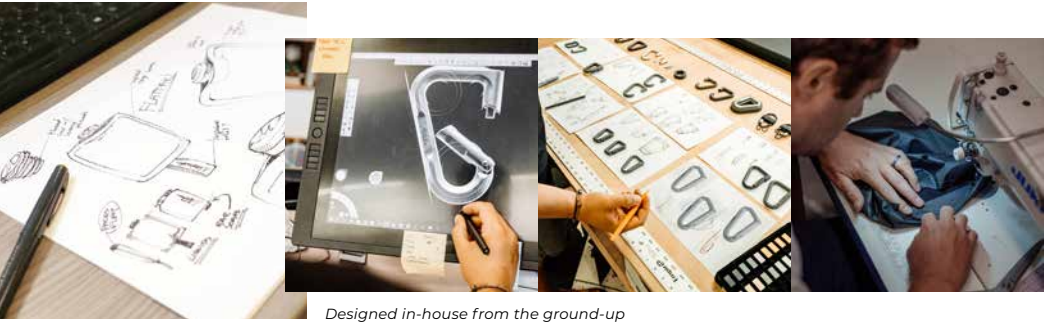

Matador—For the Travelers.

Our Mission:
To engineer remarkable travel equipment that enables you to explore without limits.

Matador® was founded in 2014 by two travel-obsessed product designers. Boundless possibility is what motivates us to step outside the familiar—and why our pursuit to build the highest-performing travel equipment in the world is centered on innovation and design that challenges the status quo.

We believe adventure lives outside the familiar, and we're hellbent on building the right equipment to take you there.

Designed in-house from the ground-up

WHY WORK WITH MATADOR®

- 

Seize the Moment in Booming Travel—Forecasts indicate the global travel market will reach \$1.5 trillion in 2025 as consumers eagerly seek out new experiences and invest in quality travel essentials. Equip your customers with the high-quality gear they need.
- 

Matador® is easy to work with: Real people, local reps, and a focus on retailer success.
- 

Matador® products are high quality, unique, and never found at discount retailers.
- 

Matador® products are built with sustainability in mind.
- 

Matador® protects you from Amazon. No 3rd party resellers. Most products are not available on Amazon. Available products are listed significantly above MSRP, meaning you will be offering better pricing than Amazon.

Treading Lightly: Our Commitment to Sustainable Exploration

At Matador®, sustainability is not a marketing tool, it's the foundation of everything we do. Respect for the world we travel is woven into the fabric of our company culture and every product we build.

To help meet our sustainability goals, we prioritize Bluesign®-certified fabrics and incorporate recycled materials throughout our product line. Our equipment is designed to not only be kinder to the planet but also built to last—and our free in-house repair program ensures it. Our commitment extends beyond product design to include Matador® HQ, powered by renewable wind energy, an active involvement in local community initiatives, as well as a company-wide carbon offset program ensuring accountability throughout our supply chain.

With this ground-up sustainability ethos, we work hard to ensure every step we take leaves a more positive footprint on both our global and local environment.

We use fabrics that meet Bluesign® criteria, the gold standard in sustainable materials.

Many of our products feature recycled materials and are rigorously tested to ensure they perform equally or better than their non-recycled counterparts.

All Matador products are free of all intentionally added PFAS, in compliance with CA AB-1817 requirements.

Our in-house repair program keeps our equipment out there. All products, in or out of warranty, are eligible for our free repair program.

Boulder, CO Headquarters powered by WindSource® renewable wind energy certified by Green-e Energy.

Our company-wide carbon offset program ensures accountability, all the way to our freight and shipping.

We have successfully reduced plastic in our packaging and use Forest Stewardship Council® packaging materials for high volume products.

Look for symbols throughout the catalog that indicate: products built from Bluesign® materials, post-consumer recycled materials, as well as products that are fully PFAS-Free. Visit MatadorEquipment.com/pages/sustainability-report for more info.

ADVANCED SERIES

Engineered for ultralight outdoor travel. Advanced Series equipment is our lightest, most weatherproof, equipment. Technical outdoor materials, sealed seams, and an alpine feature set are expertly engineered for performance that will take you further.

The Advanced Series lineup features high wear panels reinforced with UHMWPE (ultra-high-molecular-weight polyethylene), which delivers an incredibly high strength-to-weight ratio. These white threads are virtually impossible to tear, so the grid pattern you see creates an infallible ripstop effect, without adding any additional weight. Because of their molecular makeup, UHMWPE fibers are 7x stronger than structural steel and 3-4x stronger than nylon fibers.

UHMWPE MATERIAL
